

**Toni Foster Memorial Library Opening & Dedication
Friday November 17 at 1:30 PM**

We are pleased to announce that on November 17th the Toni Foster Memorial Library will be open for circulation! We are hosting a dedication and ribbon cutting ceremony, as well as offering tours of the library and the school for community members.

Camp Sherman community members and BBS families are invited to get their own library card that they will be able to use during community library hours (Tuesdays 3-5PM). We have a collection of children's books, as well as many that appeal to all ages. There is a special collection of "legacy books" that have been living at BBS for many years, including the Zoa Burdock library collection. If you hope to get a library card issued please bring a piece of mail for us to validate your Camp Sherman address. Coffee, tea, and light refreshments we will be offered.

Teamwork in P. E. By Talon (grade 4)

Our P.E. teacher, Mr. Sharp likes us to do teamwork because he thinks it's better for us to work together instead of working alone. We do teamwork by passing the ball or giving advice to a teammate. It's good to learn teamwork

because when you get a job you will need to know teamwork, to make it easier.

In P.E. we play lots of games like soccer, lacrosse, sprout ball, and basketball. We play these games because it's better for all of us to play together as a group instead of playing alone. In our games we have even numbered teams and both teams usually score.

While we kids are doing all these awesome games we are also getting exercise. Exercise is this energy we get by running, walking or moving around. Exercise is your body stretching to do more running and walking.

I asked some other students about what they think about P.E. Weston thinks, "it's exceptional exercise!" Audrie thinks she's the "boss" at P.E. And Ace thinks it is, "amazingly amazing!" I think P.E. is a really good opportunity for kids to make friends because teamwork allows us to cooperate with other students.

The Colorful Color of MART By Athan (grade 5)

This year we do origami and we get to use colored pencils. Our math teacher Ms. Steele made MART up: math + art. We do art but we use math to do the art like measuring a piece of paper to the right size. Every one inch, half inch, centimeter, half a centimeter, if you're really good at it you can do a millimeter or if you're even better than that you can do half a millimeter! Jojo said "MART is really fun because we use colors and math at the same time and it is really fun. Ms. Steele said, "I like to do MART because the students enjoy it. And math is not just in the classroom it's in art and outside of the classroom."

Emily said, "MART is more fun than normal math days." Many kids are wanting to do origami in mart like last year. Rope said, "I like it because you get to interact with people." Keanan said "I like drawing and making patterns." Mrs. Steele is a good math teacher and I think she deserves a medal for being the best math teacher. 100% of the class agrees with me.

Algebra Fun By Ilya (grade 8)

In BBS a certain group of students are in algebra 1 math. To find the number of students doing algebra at BBS do this math $x+y2-4-3+42-15-1$ if $x=1$ and $y=3$. We are using an online program for our math called ORVED which stands for Oregon Virtual Education. Our teacher is named Kevin Brewer, who is very helpful.

In ORVED's algebra 1 course we have 4 modules each having 7 teaching parts and 4 test parts. The teaching parts usually have 8 questions and can be challenging. Before we do the lesson quiz though we have a little slideshow of information. The test has around 4 parts, a pretest, a DBA (discussion based assignment), and two test parts.

During the DBA Mr. Brewer talks to us about our mistakes. We can put in funny stuff. Cody Hanks says "Hardest math problem? Probably the concrete problem." That was also one of the hardest math problems for me. As you can see we have a lot of fun in math class.

Black Butte School is a K-8, two room schoolhouse nestled in the small community of Camp Sherman, OR.

To learn more about our programs contact Delaney Sharp at 541-595-6203.
